Assess the session using the SII Method of Assessment

Strengths (including why)

Very well researched topic and well presented and inspiring because I am going to use her work in my course.

Areas for Improvement (including how)

The time was not adequate and should have been presented as a plannary session

Insight (including significance)

It was very insightful to see that research on cultural competence is not as well developed as well as the awareness as I thought. CQ I has a cortical role in P.E and it should be included in the next conference as a key note session.
