Assess the session using the SII Method of Assessment

Strengths (including why)

An appropriate expert for a keynote - lots of experience, significant achievement

A likeable delivery with plenty of humor and some self deprication to put the audience at ease and generate a connection

Areas for Improvement (including how)

PE practices were not used during the session. Replacing the lecture with activities to more deeply understand what the speaker was trying during this journey would be much more growth-oriented.

Insight (including significance)

A really quality effort achieved early can spawn an awful lot of success extending from that first effort.
