To See Growth, Inspire Learners:

Creating **inspired** Learning Environments

The 2020 PE Conference seeks to illustrate how Process Education principles, practices, and tools can be used to create conditions for **vibrant learning environments** that more deeply engage students, faculty, and staff. Learning Environments beyond the traditional classroom, such as corporate training and educational professional development, are all encouraged. It is our goal for conference participants to experience this kind of positive environment for accelerating learning and growth. Come join us!

SESSION TYPES

- **Professional Development & Research Workshops, Paper Sessions, & Symposia** There will be multiple breakout sessions that explore and disseminate best practices in teaching/learning, educational research, and sharing experience/expertise related to creating inspiring learning environments
- **Plenary Sessions** There will be two keynote sessions and expert panels where featured guests will share expertise, innovation, and their vision for inspired learning environments
- **Hall of Innovation** In this poster session attendees share classroom practices that create quality learning environments for personal/community growth
- **Online Sessions** There is a continuous track of inspiring programming available for distance participants
